

ENDUROGEL 6V260Ah

Valen ENDUROGEL battery is rechargeable, deep cycle, Valve Regulated Lead Acid (VRLA). Thanks to its Catalyst Life Extender, the Valen ENDUROGEL stands unique and apart from any other Gel battery. The Catalyst substantially reduces sulphation, thermal runaway, delamination and battery dry out; all major killers of VRLA batteries. By recombining hydrogen and oxygen ions, the Catalyst Life Extender can provide a longer, fuller and greener life. Valen ENDUROGEL batteries are ideal for use within Communications, solar and other mission critical cyclic applications.
