

VALEN 24V 1200WH SOLAR PACKAGE

KP09281

The Valen Solar Packages provide a streamlined plug and play system to improve procurement time and on-site efficiency.

The Valen Solar Packages have been developed to simplify solar installations and provide off-shelf solutions, including;

- Battery technology used is recommended for solar applications, providing longer design life than other battery technologies.
- Quality solar panels, which are sized appropriately to recharge your batteries after several 'grey' days.
- Simple to install Solar Bracket, which can be mounted on an extensive range of pole sizes.
- Solar brackets are wind certificated which reduces your liability and risk.
- Victron controllers which are easy to program and able to be connected to via Bluetooth as an upgrade option

KP09281

SOLAR PANEL PACKAGE

Package Includes

- 1x Valen ENLIFEN 24V100Ah Battery
- 1x Valen 300W Solar Panel
- 1x Clenergy PM1 Post Mount Bracket
- 1x Victron Smartsolar Solar Controller MPPT 75/15
- 3m of figure 8 Cable
- 1x pair MC4 connectors

System

The Valen 24V1200WHR Solar Package system produces;

- 1200Whr per day
- Working on 4 hours peak sun
- Batteries providing 90Ah (1920Whs)
- Working on 80% DOD

LOAD:	BACKUP TIME:
24v 40Ah or 960Whs usable power per day	2 days back up
50% increase in solar for recharge of batteries following bad weather	
24v 66Ah or 1584Whrs usable power per day	1.2 day back
25% increase in solar for recharge of batteries following bad weather	

- This package has been designed to suit 24vDC
- A 80% depth of discharge (DOD) has been worked on for the batteries.
- The solar design has been calculated on 4hrs peak sun with the solar panels installed on a 30° angle facing north.
- Suggested applications; Surveillance, remote power, access control, solar signs.
